Selective removal of non-original building components on the back/east façade (rear ell, small basement entry, and stone retaining walls) to accommodate a new public accessible building entrance. Removal of non-original addition to the outbuilding with the historic portion of the outbuilding to be relocated adjacent to the southeast corner of the Fiske House with exterior to be restored. Note: demolition of these elements was approved by the Chelmsford Historical Commission on July 14, 2020.

The new proposed entry and restoration work on the east building façade is designed for compatibility with the existing historic structure, using appropriate materials and design elements. Further, please note that providing as accessible entrance at any other building side is not possible without severely impacting the property's historic integrity.
